

CASE STUDY

How Brookland Baptist Church Unified Video Surveillance Across Multiple Facilities with **WATCHMAN**

CUSTOMER OVERVIEW

Brookland Baptist Church is one of the largest and most active ministries in the Columbia, South Carolina area. The church operates **multiple worship, educational, administrative, and community-service facilities** throughout the region, serving thousands of congregants, students, staff, and visitors.

Maintaining **reliable security visibility** across these locations is critical to ensuring a safe environment for everyone who enters their facilities.

CHALLENGE

As Brookland Baptist Church expanded its ministries and facilities over the years, maintaining effective video surveillance across **multiple locations** became increasingly challenging.

The church's existing surveillance platform suffered from **ongoing reliability issues** that affected daily security operations, including:

- Cameras falling out of synchronization
- Video streams freezing or failing to refresh properly

- Significant delays in live video viewing
- In some cases, cameras displayed footage hours-or even days-behind real-time events
- Difficulty maintaining consistent visibility across multiple facilities

These issues reduced **confidence in the surveillance system** and created **operational challenges** for the church's security personnel. Brookland Baptist Church needed a **dependable solution** that could provide **stable, real-time video monitoring** while simplifying **surveillance management across multiple locations**.

“

With Watchman, Brookland Baptist Church gained reliable real-time visibility, improved system stability, and a scalable foundation for future expansion.

SOLUTION

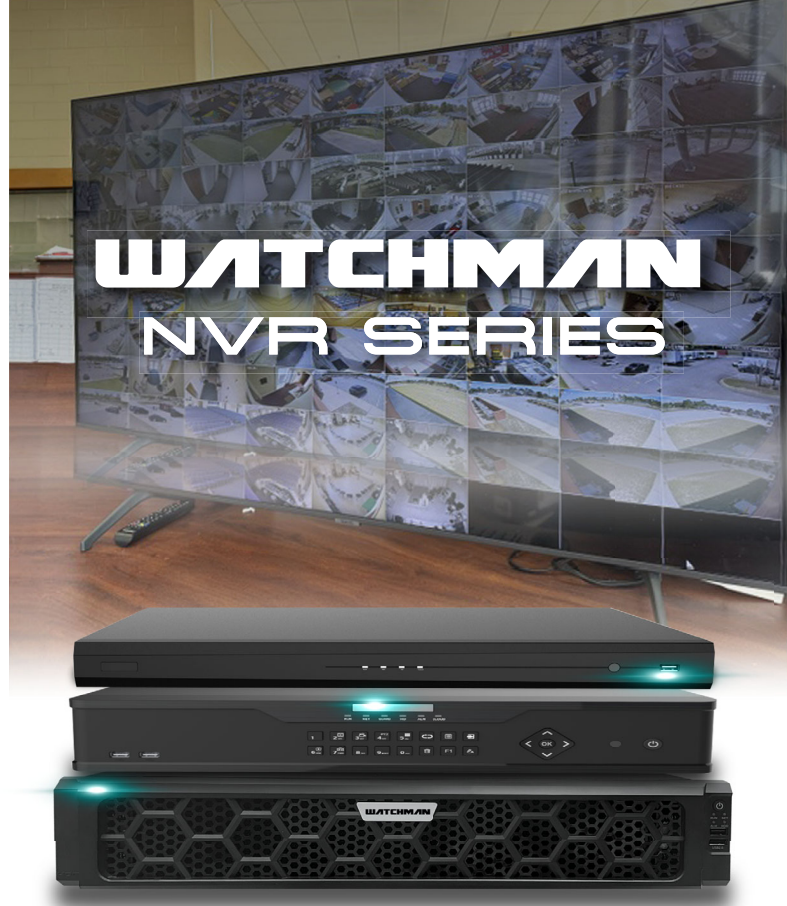

Working with **AIM Integrators**, Brookland Baptist Church selected the **Watchman Video Surveillance Platform** from Power Technology Inc. The Watchman system was deployed across **key church facilities**, including:

- Main Church Facilities
- Children's Academy
- Conference Center
- Federal Credit Union

The solution utilizes **Watchman Enterprise NVR systems**, **high-definition IP cameras**, **Todaair managed PoE networking equipment**, and **fiber-connected infrastructure** to provide **centralized monitoring** across the church's facilities.

The conference center serves as a **primary monitoring location** where security personnel can view and manage cameras from **multiple locations** through a **unified platform**.

The architecture was designed to support **future growth**, allowing additional facilities to be integrated as future upgrades are completed.

EQUIPMENT DEPLOYED

The current deployment includes:

- Watchman Enterprise NVR Systems
- Approximately 75+ IP cameras
- Todaair Managed PoE Switches
- Fiber-connected network infrastructure utilizing SFP uplinks
- Centralized monitoring workstations

Additional facilities are scheduled for **future integration** into the **Watchman Platform**.

With Watchman, Brookland Baptist Church gained a stable, synchronized surveillance system built for real-time visibility across multiple facilities.

THE RESULTS

01 Reliable Real-Time Monitoring

The **synchronization and latency issues** experienced with the previous system were eliminated. Security personnel now have access to **dependable real-time video** across connected facilities.

02 Improved System Stability

One of the most significant improvements has been the overall **stability of the surveillance platform**. Video streams remain **synchronized and responsive** without the **freezes and delays** that previously affected operations.

03 Centralized Visibility

The Watchman platform provides a **unified surveillance environment**, allowing security personnel to monitor **multiple facilities** from a **centralized location**.

04 Enhanced Security Operations

Brookland Baptist Church maintains a **dedicated security team** responsible for monitoring its facilities. With a **reliable surveillance platform** in place, personnel can focus on **safety and situational awareness** rather than troubleshooting system issues.

05 Built for Future Expansion

As additional facilities are upgraded, the Watchman platform provides a **scalable foundation** that can continue growing alongside the church's needs.

CUSTOMER FEEDBACK

"They love the fluidity of the product. Everything stays up and synchronized. The previous system would bog down continually."

— AIM Integrators

WATCHMAN

Real-time visibility
across multiple facilities

CONCLUSION

Brookland Baptist Church needed a **surveillance platform** capable of delivering **reliable performance across multiple facilities** while eliminating the **synchronization and stability issues** that had affected its previous system.

By standardizing on **Watchman**, the church gained:

Reliable real-time video monitoring

Improved system stability

Centralized surveillance management

Better situational awareness

A scalable platform for future growth

Today, the **Watchman Video Surveillance Platform** helps Brookland Baptist Church maintain a safer environment for its congregation, students, staff, and visitors while providing the reliability and performance its security team depends on every day.

- **Partner Integrator** : AIM Integrators, Inc.
- **Solution Provider** : Power Technology Inc.
- **Platform** : Watchman Video Surveillance Systems
- **Location** : Columbia, South Carolina

"Reliable real-time visibility across multiple connected facilities."
